In Re: MM Docket 99-25

This letter is written as part of the public comment on Low Power FM Radio. Apparently much pressure is being applied by the broadcast industry to prevent the expansion of low power FM stations. Please realize that these stations can provide much needed public services all over the nation. Here in Central Texas, such a station would not interfere with the established broadcasting stations, but would allow for public participation in programming that would not be profitable for commercial broadcasting. Please vote to allow low power FM stations.

Sincerely;

Harold R. Steadman
